TRUST YOUR SMILE TO A SPECIALIST

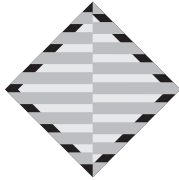

Dr. Marshall Fagin
Prosthodontist

Q: Can you fix my smile without orthodontics?

A: Some teeth have spaces between them, some are crowded and crooked with overlaps, and others may be additionally complicated by a deep overbite or excessive wear. All of these impact treatment recommendations and long term prognosis if veneers or Lumineers™ are placed. If orthodontics can achieve the esthetic goals desired, and the patient is willing to be compliant throughout, we encourage this form of treatment. Due to prior tooth problems like old unaesthetic crowns, multiple fillings or dark color of teeth, several may still need veneers or crowns after orthodontics, and a commitment to wearing long term retention appliances are needed. As a Prosthodontic Specialist, I often have to work as a team with the Orthodontist, communicating before, throughout, and following treatment, to be sure restorative and esthetic objectives will be met and maintained. **Call Fagin & Associates - Prosthodontists today, for your comprehensive exam and consultation.**

- Tooth Whitening
- Cosmetic Veneers & Crowns
- Complete Dental Rehabilitation
